

PRODUCT-INFO

ESSENTIAL COMPONENTS
FOR THE PROFESSIONAL

RG4.0

Bosch introduces its FIRST recovery machine – with competitive recovery rates on all refrigerants (included A2L). With an 1/2 HP / 1750 rpm motor – this design provides better recovery throughout, in all conditions. Packaged in the recognisable Bosch housing the RG4.0 out-performs all competitors, but remains lightweight and compact. The RG4.0 will meet your needs now, and those in the future.

- **Suitable for A2L refrigerants such as R32**

| | |
|---------------------|---|
| Refrigerants | R32, R-1234YZ, R-1234ZE, RRR12, R22, R134A, R401A, R401B, R401C, R402A, R402B, R404A, R406A, R407A, R407B, R407C, R407D, 408A, R409A, R410A, R411A, R411B, R412A, R417A, R422A, R422D, R427A, R500, R502, R507, R509 and others |
|---------------------|---|

| Recovery Rates (tested to UL standards) | | R410A | R22 | R134a |
|---|---|--------------|------------|--------------|
| | Liquid Capacity, max push pull: (kg/hr) | 410.5 | 367.62 | 306.24 |
| | Liquid recovery rates: (kg/hr) | 122.1 | 199.46 | 103.62 |
| | Vapour recovery rates: (kg/hr) | 10.7 | 9.90 | 7.26 |

- **Available in both 110v and 220v**

| | |
|----------------------|--------------------------------------|
| Product codes | 240v – S070291GB 110v – S070290GB |
|----------------------|--------------------------------------|

| | |
|-------------------|---|
| Compressor | Single cylinder 1/2 HP, 1700 / 1750 rpm (110) 1/2 HP, 1400 / 1450 rpm (240) |
|-------------------|---|

| | |
|----------------|--|
| Voltage | 240V 50-60 Hz or 110V 50-60 Hz/250W |
|----------------|--|

| | |
|-------------|--------------------|
| Fuse | 12A (110) 8A (240) |
|-------------|--------------------|

- **Maximum operating pressure of 38.5 bar / 550 psi**

| | |
|------------------------------|--------------------|
| High Pressure Cut Out | 550 psi / 38.5 bar |
|------------------------------|--------------------|
